Ski Information Sheet - Premier Package

SKI MODEL:

AVENGER 82

AVENGER delivers the most versatile, high-performance on-trail ski that Rossignol has to offer. With medium waist widths, deep sidecuts, Power Turn on-trail camber and constructions that come directly from our race skis, the Avenger Series became the PSIA's favorite technical on-trail ski in 2010-11.

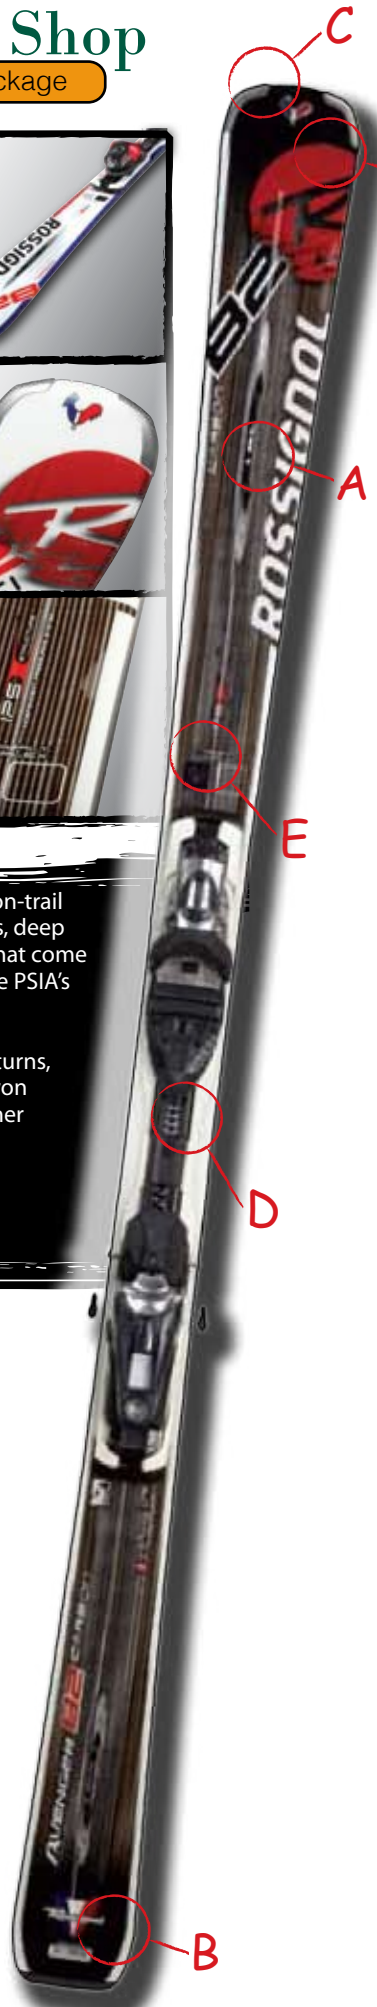

Delivering superior edge grip, precise hard snow carved turns, broad turn shapes and incredible ease-of-use, Avenger won more accolades among magazine ski testers than any other on-trail ski this year.

Avenger was last season's favorite among the skiers and ski shops who prefer performance skiing on hard snow and groomed runs.

AVENGER 82 STATISTICS

- SIDECUT: 128/82/112
- RADIUS: 17.8m @ 177
- SIZE: 162, 170, 177, 182
- BINDING: AXIUM 120

- TECHNOLOGY:
 POWER TURN CAMBER
 OVERSIZED
 ALL-MOUNTAIN TIP
 CONSTRUCTION:
 STRUCTURE: SANDWICH
 CORE: WOOD
 LAMINATES: TI BASALT

A **POWER TURN** **CAMBER**

- 100% classic high camber under foot
- Delivers power, energy and edge grip for groomed run performance
- Stores energy and provides explosive snap and boost

B **OVERSIZE SIDECUT** **OVERSIZE SIDECUT**

- Aggressive oversized tip & tail dimensions give strong edging, power and precision
- Wider waist dimensions increase stability and ease turn transition
- Combination gives accurate edge feel and unprecedented stability

C **ALL MOUNTAIN TIP TECHNOLOGY** **ALL-MOUNTAIN**

- Tip extends ski's sidecut beyond snow contact point
- When on edge, the sidecut increases, creating strong turn initiation
- Outstanding flotation in soft snow

D **SANDWICH LAMINATE CONSTRUCTION**

- Wood cores, vertical sidewalls, Basalt fibers, metal and high-tech laminates
- Classic sidewalls create direct edging pressure while core and laminates provide flex, power and stability

E **COMPLEX** **INTEGRATED COMPLEX TECHNOLOGY**

- New aerospace fiber layers replace traditionally used fiberglass layers
- Titanium or aramid stringers are woven into Basalt fibers dramatically enhancing the skis performance
- Ultimate material for removing vibrations and improving snow contact
